

## **REQUIREMENTS FOR AMMONIUM NITRATE TRANSPORTATION:**

**1.1.** As the ammonium nitrate produced by the manufacturer is pre-packaged at temperatures not exceeding 50°C, the temperature of the ammonium nitrate delivered to the buyer can exceed the ambient temperature.

**1.2.** When transporting ammonium nitrate pre-packaged in big bags of 500 kg by ships, it can be stored in bags stacked on top of each other in 10 rows for a short period (up to 9 days).

**1.3.** When transporting ammonium nitrate pre-packaged in big bags of 600 kg by ships, it can be stored in bags stacked on top of each other in 8 rows for a short period (up to 9 days). In exceptional cases, 600 kg bags of ammonium nitrate may be transported stacked on top of each other in 9 rows, but the transport time must be less than 9 days.

**1.4.** These transport conditions do not apply to the transportation of ammonium nitrate in big bags of 1000 to 1250 kg by ships to Australia. It is transported at the discretion of the Commercial Service according to the transportation opportunities.

**1.5.** If rain starts at the time of loading or unloading of ammonium nitrate on a ship, the hold of the vessel must be closed and the loading works must be stopped.
