

STORAGE REQUIREMENTS FOR UREA AND SLOW RELEASE NITROGEN LITFERT STABILION FERTILIZERS (HEREINAFTER REFERRED TO AS THE SLOW RELEASE FERTILIZERS):

1.1. Pre-packaged urea and slow release fertilizers can be stored in closed, dry, ventilated warehouses or outdoors, protected from direct sunlight, atmospheric precipitation, moisture (rain, snow; the bag must not be placed in water and water must not accumulate on the bag).

1.2. Bulk urea must be stored in closed, dry, ventilated warehouses. Bulk urea must not be stored outdoors.

1.4. Big bags of urea and slow release fertilizer shall be stored in an upright position, stacked on pallets without protruding nails, wood screws, wood chips or other sharp objects that could damage the big bag.

1.5. In dry storage, big bags of urea and slow release fertilizers can be stored in an upright position on pallets or directly on the floor with a cardboard or plastic film applied to protect the bags from smearing.

1.6. Urea and slow release fertilizers pre-packaged in big bags of 500 kg cannot be stacked on top of each other in more than 4 rows when stored in stacks.

1.7. Urea and slow release fertilizers pre-packaged in big bags of 1000 kg cannot be stacked on top of each other in more than 3 rows when stored in stacks.

1.8. Urea and slow release fertilizers must not be contaminated with other substances.

1.9. The guaranteed shelf life of urea and slow release fertilizers stored in warehouses is 12 months from the date of manufacture, and 9 months from the date of manufacture when stored outdoors.
