

TRANSPORTATION REQUIREMENTS FOR UREA AND SLOW RELEASE NITROGEN LITFERT STABILION FERTILIZERS (HEREINAFTER REFERRED TO AS THE SLOW RELEASE FERTILIZERS):

- 1.1.** When transporting urea pre-packaged in big bags of 500 kg by ships, it can be stored in bags stacked on top of each other in 7 rows for a short period (up to 7 days).
- 1.2.** When transporting slow release fertilizers pre-packaged in big bags of 500 kg by ships, it can be stored in bags stacked on top of each other in 4 rows.
- 1.3.** When transporting slow release fertilizers pre-packaged in big bags of 1000 kg by ships, it can be stored in bags stacked on top of each other in 3 rows.
- 1.4.** When transporting urea not sprayed with the conditioning additive, packed in big bags of 500 kg by ship, it is not recommended to store it by stacking the bags on top of each other in 4 rows or more, as the urea sticks to pieces that crumble when pressed by hand.
- 1.5.** If rain starts at the time of loading or unloading of urea and slow release fertilizers on a ship, the hold of the vessel must be closed and the loading works must be stopped.
